

IN THE SPECIFICATION:

Please amend the paragraph at page 6, lines 14 to 21 as follows:

--At step S101 of Fig. 2, the file transfer application starts a process. After starting the process, the file transfer application reads a location of the file server 16, 17, 18 that is a file transfer destination from a predetermined area of the CF card at step S102. This area is preferably out of the control of the normal file system, and may be an attribute memory area (Card Information Structure or CIS) ~~(CIS)~~, for example.--
